DECISIONS

App from Scratch Seminar Part 2: Building Rule Driven Workflows

FLOW CENTRIC versus RULE DRIVEN

“Flow-Centric” or Sequential

- The data is only useful from start to end (and history)
- The process is predictable
- The state of the data is completely governed by which step you are on
- The process is central

“Rule-Driven” or Responsive

- The data is useful across many actions / workflows
- The process may not be predictable
- The activities/actions are governed by the state of the data
- The entity (data) is central

App from Scratch
Seminar Part 2:
**Building Rule
Driven Workflows**

EMPLOYEE ONBOARD vs EMPLOYEE

[FLOW CENTRIC] versus [RULE DRIVEN]

“Flow-Centric” or Sequential	“Rule-Driven” or Responsive
